AGRIBUSINESS PROGRAM – AGRIBUSINESS MANAGEMENT

This program is designed to produce marketable graduates that are research-oriented and knowledgeable in bridging the gaps between policy and practice in agribusiness; agribusiness operations and technology and maintaining a competitive advantage in public and private agribusiness activities.

AGRIBUSINESS PROGRAM – AGRONOMY

This program is designed to meet the needs of a diverse student body whose unifying characteristic is an interest in the application of biological principles to the solution of problems in crop production and resource management. The program aims to foster a sense of community among the students and to provide them with a breadth of knowledge about agronomic and horticultural principles and how they are used in a variety of practices.
